Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The frame house is a one-story structure with a gable roof main facade. The house is three-bays by three-bays and covered in a modern siding. The main facade is symmetrically arranged with a central entrance and three-section picture windows in the other bays and a single one-over-one window in the gable. There is a full-length, one-story porch on a concrete block foundation. According to the owner this structure was originally a two-story house which was reconstructed to its present shape after it was damaged in a fire. The current design of the structure is mid-20th century.

The property is located on the north side of Sandy Hook Road, approximately .06 mile east of Clark Road in Sandy Hook. The house sits back from the road. The main facade faces south.

The one-story structure is constructed of frame covered in a modern aluminum siding. The structure is built on a fieldstone foundation. The main facade is symmetrically arranged with a central entrance and a three-bay, one-story porch. On the outer bays of the first story are large three-section picture windows. In the gable is a one-over-one sash window. The porch sits on a concrete block foundation and has a stick railing, square posts, and curved brackets. The porch roof is hipped. The sides of the house have two-over-two sash windows in each bay. The gable roof has a boxed cornice and is covered in asphalt shingles. A concrete block chimney flue rises from the center of the structure.

There are no significant outbuildings on the property.
